

FROM THE DESK OF THE CHIEF OF POLICE

Volunteer Energy Cooperative's Customer Share program awards grant to Police Department.

On February 13, 2023, VECustomer Share representative, Roger Thackston dropped by the Lake Tansi Police Department and presented Chief of Police, Anthony Brown with a check to assist the department with acquiring needed equipment. In January, 2023, the department also received a grant from Middle Tennessee Natural Gas's Project Hometown Help. The department has received help from both programs several times. This help really goes a long way in assisting the department with needs that are not covered in the regular budget.

Both organizations have been a real asset to the community by assisting with funds needed to equip the department which helps us better serve the community of Lake Tansi. I would like to encourage all VEC and Middle Tennessee Natural Gas customers to participate in these programs by allowing their monthly bill to be rounded up to the next dollar. The funds raised by these programs are used to award grants to worthy organizations within our community.

I want to thank the board members of both programs for their show of confidence in the Lake Tansi Police Department by awarding us these grants to help us better serve the citizens of Lake Tansi.

Anthony Brown, Chief of Police
